

# OPPORTUNITY CHARGING

- ✦ Connect battery to the charger at **ALL** breaks, lunches, shift-changes and idle periods longer than 10 minutes. This is critical to maintaining the battery's state of charge throughout the day.
- ✦ **DO NOT SKIP CHARGES** throughout the working day, or at the end of scheduled work periods.
- ✦ Ensure that the battery and charger plugs are **COMPLETELY** connected together.
- ✦ Do not unplug battery with the charger running before pressing the stop button.
- ✦ Do not attempt to manually equalize battery. The charger will perform this function automatically on a specific day of the week.
- ✦ Routine watering of batteries required **AFTER** the scheduled equalize charge.
